------------------------------------	-----------------	----------------------------------------------------

I am a skilled professional with a strong background in React, Python, JavaScript, and MySQL. My problem-solving abilities and analytical mindset enable me to tackle complex challenges efficiently. I am flexible, capable of working both individually and as part of a team, and I take pride in graduating in the top 5% of the ALX Tech program and being selected for the prestigious Gold Fellowship program at The ROOM, showcasing my dedication and expertise in the field.

EXPERIENCE

React Developer at Dallol Tech	2023
<ul style="list-style-type: none">Involved in the development of a learning platform from scratch, prioritizing user-friendly design and responsiveness.I was also involved in the front-end implementation using React for a bus reservation web app, focusing on delivering an engaging user experience.I was involved in getting both platforms from 0% implementation to 50%.	

EDUCATION

Addis Ababa Science And Technology University - AASTU	2019 - 2024
<ul style="list-style-type: none">Bachelors of Software Engineering	
African Leadership X - ALX	2022 - 2023
<ul style="list-style-type: none">Software EGINEERING	

SKILLS

- Programming Lang: JavaScript, Python, Java, C++
- FrameWork: React, Next, Node
- DataBase: MySQL, PostgreSQL, MongoDB
- Project Management Tools: Trello, Asana
- Soft Skills: Communication, Collaboration, Attention to Detail
- Human Language: English (Fluent), Amharic (Native)

PROJECTS

Missing Person Finder	2023/24
Developed a mobile app and admin dashboard for reporting missing individuals, integrating facial recognition and feature-based search for enhanced accuracy.	
Tools Used: Flutter, Nodejs, React, MongoDB, Firebase	
ReciApp	2023
Using an API for recipes I have implemented to display recipes. Users can filter recipes with ingredients, food types and Intolerances. A user is also able to save favorite recipes specific to the user.	
Tools Used: React, Redux, PostgreSQL, nodejs	
MyAASTU	2021/22
Developed a web app to help university freshmen and students in general find essential information and services, including a menu list, helpful resources, and a map for navigating to service providers. The solution addresses challenges newcomers face in getting to know the campus.	
Tools Used: Html, Css, JavaScript, PHP, MySQL	
TrackExp	2024
Developed a cross-platform mobile app to track trips and expenses, with seamless sync between local storage (Hive) and MongoDB. Integrated Firebase authentication and a Django API for secure backups. Implemented a side-by-side interface for resolving data discrepancies, ensuring data accuracy and availability across devices.	
Tools Used: Flutter, Django, MongoDB, Firebase
