WORK EXPERIENCE

Web Developer - Intern   **2023**

Dallol Tech l Addis Ababa

During my internship, I played a vital role in two major projects. Firstly, I spearheaded the development of a learning platform from scratch, focusing on user-friendly design and responsiveness. Additionally, I led the front-end implementation using React for a bus reservation web app, ensuring an engaging user experience.

PROJECTS

MyAASTU   **2021 - 2022**

Based on the team's personnel experience as newcomers; we faced a problem of knowing the university so we sought a solution for it. We developed a webApp to help freshmen find information and services in the university. I developed a solution that gets the freshmen the services that include a menu list, helpful information, and a map to get to the intended service provider.
**Tools used** Html, Css, JavaScript, PHP, MySQL
### Inventory Management System   **2022**

We implemented a website that is used to store products for buying and selling. I implemented authentication and authorization, buying products available and also adding products by brand and Category.
Tools used HTML, CSS, JavaScript, PHP, MySQL

ReciApp   **2023**

Using an API for recipes I have implemented to display recipes. Users can filter recipes with ingredients, food types and Intolerances. A user is also able to save favorite recipes specific to the user.

Tools used React, Redux, SQLite, nodejs
